POM®-100B PRECISE OXYGEN MONITOR

US & FOREIGN PATENTS ISSUED & PENDING

BREAKTHROUGH **TECHNOLOGY**

The First APP Enabled Programmable Oxygen Monitor

- · Smart Bluetooth Features
- Unlimited Offline Storage
- High Accuracy 2-Point Calibration
- · Long Battery Life and Fast Charging
- Designed for Universal Voltage

Monitor Features

Built-in Dust Filter — Enhances Operation in Moderate to Extremely Dusty Environments

Kit Contents

- POM®-100B with Built-in Sensor
- Polycarbonate Carrying Case
- Polyurethane Extension Tubing (5' or 1.5m) with Quick Connect and Stainless Steel Probe (6" or 16mm)
- Power Supply/Charger (US or Euro)
- USB Printer Cable
- Phillips Head Screwdriver

Intelligent Color Notification System

POM®-100B has an Intelligent Color Notification System for a quick visual check on current oxygen levels. This visual Notification System is designed with universally recognizable colors (red, yellow, and green) that appear on the device, as well as connected phone, laptop or tablet.

"Alarm Limits" can be customized to the operator preferences.

RED indicates that the current measurement is greater than the "Upper Alarm Limit."

YELLOW indicates that the current measurement is between the "Upper Alarm Limit" & "Lower Alarm Limit."

GREEN indicates that the current measurement is lower than the "Lower Alarm Limit."

Bluetooth Transmitting Capabilities

The POM°-100B accurately measures low concentrations of oxygen in purged tubing and high purity welds, ensuring a high-quality finish. With Bluetooth transmitting capabilities, this device allows the oxygen monitor to send the oxygen readings wirelessly to a BLE-capable device with Android/iOS/Windows operating system, allowing the operator to monitor real-time readings from remote locations, permitting the ability to access the data interface while standing up to 100 feet (30 meters) away.

Sensor Conversion Technology Upgrade from 100PPM to 5PPM Anytime

The POM®-100B can be upgraded to the POM®-5B with factory change of the sensor. *Inquire for details.*

Designed for ultra-high purity stainless steel and other high alloy metal applications, the POM®-5B delivers precise monitoring of residual oxygen down to .0005 percent (5PPM).
